Skills

- **Programming Languages:** Python, TypeScript, Java, JavaScript, C++, C, C#, R, SQL (MySQL, PostgreSQL), HTML, CSS, Microsoft PowerShell, Arduino
- **Frameworks & Libraries:** React, React Native, Storybook, Jest, Unity, Godot API, Discord API
- **Mobile & Testing Tooling:** Android SDK, Android Emulator, Gradle, Visual Regression Testing, Screenshot Testing
- **DevOps & Workflow Tools:** Git, GitHub, GitHub Actions, Docker, AWS, Agile

Experience

Open-Source Mobile Developer

December 2025 – Present

Screenshotbot – React Native Screenshot Testing Library

- Build an open-source React Native library for screenshot-based visual regression testing
- Implement a system that auto-discovers Storybook components, renders them on Android, and captures deterministic PNG screenshots
- Develop a reusable package (rn-storybook-auto-screenshots) bridging React Native and Android native code
- Integrate Android screenshot tests with Screenshotbot and GitHub Actions CI, resolving emulator configuration, permission, and stability issues
- Extract screenshot infrastructure from a prototype app into a TypeScript npm package with automated tests and distribution configuration
- Use GitHub workflows and AI-assisted tooling (Claude Code) to prototype features and refactor architecture

Projects

Audioviz | C++

September 2024 – December 2024

- Developed advanced color customization for an audio visualizer using HSV range selection and dynamic spectrum cycling
- Integrated system into oscilloscope for consistent theming, enabling customizable MP3-to-waveform rendering with spectrum rotation and user-defined modes

LEGUP | Java

January 2024 – May 2024

- Engineered backend modules enabling UI-driven creation of first-order logic puzzles
- Built import/export features to support user-generated content
- Collaborated in Agile team to refine game mechanics and meet project milestones

Phoenix Bionics | Arduino, HTML, CSS

June 2023 – August 2023

- Programmed Arduino microcontrollers and integrated hardware to build cost-effective bionic hand prototypes
- Designed enhanced circuitry for improved performance
- Rebuilt company website to align with new branding, improving user engagement and navigation

Such Life | C, C#, Unity

September 2022 – December 2022

- Optimized role-playing game mechanics by refining movement/combat systems and improving animation flow
- Fixed character orientation to align with mouse input, enhancing gameplay responsiveness

Education

Rensselaer Polytechnic Institute

August 2021 – August 2025

Bachelor of Science, Computer Science, Class of 2025

GPA: 3.52/4.0; *cum laude*

Relevant Coursework

- Database Systems, Programming Languages, Data Structures, Software Design and Documentation, Distributed Systems and Algorithms, Multivariable Calculus, Differential Equations, Linear Algebra

Certifications

- Google AI Essentials V1
- Generative AI: Introduction and Applications from IBM
